

BARDONS & OLIVER

**NO. 35 & NO. 36 AUTOMATIC
CUTTING-OFF LATHES**

5 9/16" and 6-5/8" SPINDLE CAPACITY

Bardons & Oliver Cutting-off Lathes are single spindle automatics designed to form, groove, chamfer, and cut off tubing or bar stock to any desired length. Simplicity and openness in the tooling area facilitate the addition of special attachments to meet particular customer requirements.

The all new No. 35 and No. 36 Cutting-off Lathes were specifically developed to provide the flexibility, speeds, and feed rates necessary to fully utilize the latest advancements in the four basic types of cutoff tooling—high speed steel, roller cutter, carbide, and circular saw.
