

Wauseon Machine 1000 Series Ram Endformers

For up to 5/8" diameter tube

Wauseon's decision to include several features as standard, that other manufacturers only include as options at additional cost, make Wauseon's 1000 Series Endformers an extremely sensible and affordable choice. *In fact, we have successfully tooled these machines to handle several unique applications, including mechanical beadlocking, and forming specific tube ends up to 1" diameter.*

STANDARD FEATURES

- LOW PRESSURE lock-up.
- Self-contained hydraulic unit.
- Automatic drop-out.
- Precision tube stop locator.
- Smallest footprint in the industry.

OPTIONS

- Whisper-quiet Hydraulic Unit.
- Auto load/unload systems.
- Multi-Language Graphical User Interface (GUI).
- SPECIAL APPLICATIONS
These versatile machines can be tooled for specific endform tasks on up to 1" diameter tube ends.
- Customer Specified Color.

1000 Series

Wauseon Machine Ram Endformers

For up to 5/8" diameter tube

Specifications	1000 Series Endformers
Ram Force	6.81 tons (calculated tonnage)
Tube Clamp Force	9 tons (calculated tonnage)
Hydraulic Unit	10 hp, 15 gpm
Working Pressure	1200 psi
Maximum Pressure	2000 psi
Ram Cylinder	3.25" bore
Ram Stroke	3"
Shuttle Cylinder	2" bore, (N/A on Model 1001)
Max. Clamp Opening	1.5"
Cycle Rate	1.7 to 4.3 Seconds dependent on application 4.3 sec. (triple hit)
Air Required	80 psi, 2 cfm
Electrical Requirements	220/440 3 phase
Weight	1960 lbs.
Color	MAB #074-191 Rockford Blue

Footprint 44 1/2 W x 52 D
Not To Scale
